## **Amazone - 13-daagse Amazone cruise expeditie met de M/S La Jangada PDF**

---

La Jangada is een negentwintig meter lange catamaran die in mei 2019 aan haar eerste reis begon en een reeks onvergetelijke cruises in alle comfort op de Amazone, de Solimões en de Rio Negro rivier biedt.

Het schip beschikt over 12 ruime, lichte hutten versierd met inheemse kunstwerken en voorzien van grote panoramische ramen die een spectaculair uitzicht bieden op de landschappen van het Amazonegebied. De hedendaagse interieurstijl, de keuze aan stoffen en de rijke lokale smaak geven de 16 tot 25m<sup>2</sup> suites een boutique vibe. Zes suites bevinden zich op het hoofdek, en de andere zes op het bovendek, die uitkijken en uitkomen op een privéterras. Elke suite is volledig uitgerust met dubbele of twinbedden, een optioneel extra bed, airconditioning, privétoiletten en sanitaire voorzieningen met warmwaterdouches.

Het panoramische restaurant op het bovendek serveert elke dag andere gerechten. De Braziliaanse chef-kok maakt zich sterk voor lokale producten en zorgt voor een rijk Amazone-menu met lokale specialiteiten. De bar lounge en de zonnebrug zijn de perfecte plek om van lokale dranken te genieten, het uitzicht te bewonderen en ervaringen te delen met nieuwe vrienden terwijl de M/S zich een weg baant naar het hart van de Amazone.

De hoog opgeleide expeditiebemanningsleden bestaan uit een expeditieleider, natuurgidsen, kapitein, tweede kapitein en een hoog opgeleid team van brugzeilers, koks, evenals een butler en barman.

Het bedrijf verzorgt "korte" cruises van 5 dagen tot uitgebreide expedities van 12 en 13 dagen tussen Manaus, Tefé en Tabatinga, een afgelegen stadje op het grenspunt tussen Brazilië, Colombia en Peru. Wat deze langere expedities onderscheidt van vele andere is dat het gaat om cruises enkele reis, waarbij

veel dieper in het hart van de Amazone wordt gevaren. Deze pakketten omvatten de terugvlucht naar Manaus vanaf het eindpunt van de expeditie. Hoogtepunten zijn de Mamirauá en Xixuau reservaten op de Amazone en Juaperi rivieren en bezoeken aan inheemse gemeenschappen.

### **1. Amazone**

Het Amazonegebied, met zijn weelderige tropische regenwouden en ongeëvenaarde biodiversiteit, is een van de meest indrukwekkende natuurgebieden ter wereld. Het immense regenwoud beslaat een oppervlakte zo groot dat Nederland er maar liefst 100 keer in past. Als toegangspoort tot dit groene paradijs fungeert de stad Manaus, een bruisend stadscentrum met een internationale luchthaven, ideaal voor avontuurlijke reizigers die de magie van de Amazone willen ontdekken.

#### **Ontdek de Amazone: Een Avontuur van Contrast en Diversiteit**

Rondom Manaus bieden talloze lodges bezoekers de mogelijkheid om zich volledig onder te dompelen in de geuren, kleuren en geluiden van het oerwoud. Dit is zonder twijfel een van de hoogtepunten van een reis door Brazilië. Maak kennis met de charmante roze rivierdolfijnen, de 'boto', ontmoet de vriendelijke en gastvrije lokale gemeenschappen, en bewonder de unieke flora en fauna die nergens anders ter wereld te vinden zijn.

De Amazone is niet uniform; het gebied bestaat uit diverse biomen met elk een eigen karakter. De Varzea-jungle rondom de Rio Negro, bijvoorbeeld, wordt tijdens het regenseizoen overstroomd door rivieren en droogt in het droge seizoen deels op. Hier ontdekt u een unieke dynamiek in flora en fauna die volledig afhankelijk is van de getijden van de rivier.

In contrast daarmee staan de Amazone-hooglanden, zoals de regio rondom **Presidente Figueiredo**, die een vaste en stabiele omgeving bieden. Deze hooglanden worden gekenmerkt door reusachtige bomen die tot wel 80 meter hoog reiken, weelderige watervallen, en een ecosysteem dat niet afhankelijk is van seizoensgebonden overstromingen. Presidente Figueiredo, op slechts 107 kilometer van Manaus, staat bekend als het "**Land van Watervallen**" en biedt bezoekers

spectaculaire natuurwonderen zoals de **Cachoeira de Iracema** en de **Cachoeira do Santuário**. Hier kunt u zwemmen in natuurlijke poelen, genieten van avontuurlijke wandelingen en de ongerepte schoonheid van het regenwoud verkennen.

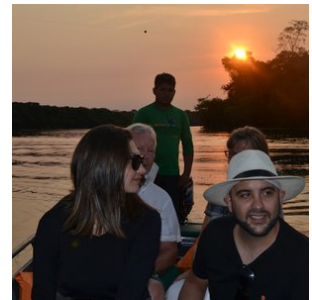

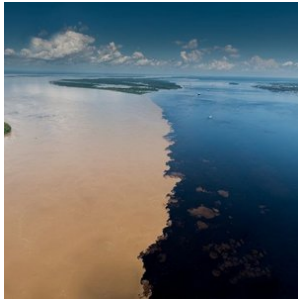

## Een Combinatiereis voor de Volledige Amazone-ervaring

Voor een complete Amazone-ervaring is een combinatiereis tussen de hooglanden en het Varzea-gebied sterk aan te raden. Verblijf bijvoorbeeld 3 nachten in een lodge in de omgeving van Presidente Figueiredo om te genieten van de watervallen en het hooglandregenwoud, en vervolgens 3 nachten in een lodge in het Varzea-gebied om de unieke overstromingsjungle te ervaren. Deze combinatie biedt een diepgaande kennismaking met de vele gezichten van het Amazonegebied en laat zien waarom het regenwoud wereldwijd tot de meest fascinerende natuurgebieden behoort.

## Amazone Cruises: Een Luxe Alternatief

Liefhebbers van cruises kunnen de Amazone ontdekken vanaf het water. Wekelijks vertrekken er cruises vanuit Manaus, variërend van luxe schepen zoals de **Grand Amazon Cruise** tot intiemere Amazone-rivierboten. Deze cruises bieden een unieke kans om de uitgestrekte rivieren en verborgen zijtakken van de Amazone in alle comfort te verkennen.

Met zoveel diversiteit aan landschappen, activiteiten en ervaringen biedt het Amazonegebied een avontuur dat zowel onvergetelijk als onvervangbaar is. Dit is een bestemming die elke natuurliefhebber minstens één keer in zijn leven zou moeten ervaren.
